## **POWER CONSTRUCTORS**

### **NUCLEAR | ENGINEERED HEAVY LIFT RIGGING AND TRANSPORTATION**

*Engineered, managed and executed through-the-hatch removal, lift and transport of a reactor vessel (RV) from containment.*

*Bigge configured this 340 foot, 26 axle beam and dolly transporter to haul a 520 ton electrical generator.*

### **Nuclear Services Update...**

*Bigge has been awarded the heavy lift crane contract for the new Westinghouse AP1000 units at each of the V.C. Summer and Vogtle projects. For more detailed information about Bigge's world wide heavy lift solutions, load charts and site applications, contact Pete Ashton, Vice President, at [pashton@bigge.com](mailto:pashton@bigge.com) or +1 (510) 638-8100.*

Bigge Power Constructors, a division of Bigge Crane and Rigging Co., specializes in serving the heavy lift and transportation requirements of the nuclear power industry.

Bigge has planned, engineered, fabricated specialized equipment, and managed the execution of unique construction, maintenance, outage and decommissioning needs at dozens of nuclear power plants throughout the United States.

We have performed 95% of the through-the-hatch reactor vessel head replacements at U.S. nuclear units, making Bigge the leader in the use of innovative rigging solutions for nuclear component replacement.

Bigge meets the demands of rigorous nuclear outage plans with a safety record that leads the rigging industry, while maintaining aggressive on-schedule project performance and high cost efficiency.

### **Bigge Power Constructors services include:**

- Next generation nuclear power plant construction
- Nuclear decommissioning projects
- Reactor vessel head replacements
- Steam generator replacement
- Specialized heavy transportation
- Dry fuel cask movement
- Single failure proof hoist supply
- Marine operations
- Transportation studies and engineering
